GV-ASRemote

GeoVision CS1320, this Face Detecting Access Controller includes exciting features from Proximity Reader. Video Intercom and Surveillance IP Camera.

Through SIP integration, GV–CS1320 allows you to identify unscheduled visitors before they are granted entry using your desk phone.

Using two–way audio to communicate who is outside, and one–touch your keypad to unlock door from anywhere at all time.

With the built–in Fisheye Camera, GV–CS1320 can effectively screen out any abnormality and send alarm to GV–ASManager platform in real–time.

The GeoVision CS1320 is your one–stop solution for multi–purpose access control.
