Simplified installation

Overview

GV-PPTZ7300, which is a U.S. patented 360° anti-blindspot network camera, that combines the panorama feature of a fisheye camera with the tracking and zoom agility of a speed dome. This revolutionary model, which integrates the utility of a 5MP fisheye lens with a 10x zoom module, allows users to achieve 360° panorama view while simultaneously able to perform pan/tilt/zoom on specific points of interest with a simple click of the mouse. To facilitate tracking, the GV-PPTZ7300 is equipped with an advanced zoom module to automatically track moving objects within the range of view. This model is suitable for outdoor installation with IP67 weather-resistance and boasts easy installation features.
